

THE FARM

The farm of my father is a wonderful place to see. There are many fresh fruits and fast growing trees. He uses fertilizer to make the plants grow healthy and far from any kind of pests. My friends love to visit our farm because they enjoy the soft-cold breeze of air touching them. My mother prepares delicious and nutritious foods for us. After eating, we spend our past time under the palm tree beside our farm, we tell funny stories and we laugh aloud. We have great time together in our wonderful farm.
